**JASON MAYER OF GIFFELS-WEBSTER ENGINEERS EARNS  
CERTIFIED PROFESSIONAL IN EROSION AND SEDIMENT CONTROL STATUS**

*Mayer One of 23 Specialists in Soil Erosion and Sediment Control in Michigan*

**ROCHESTER HILLS, Mich., Sept. 8, 2009** — Giffels-Webster Engineers today announced that Senior Engineer Jason Mayer earned accreditation as a Certified Professional in Erosion and Sediment Control. Mayer is one of 23 such specialists in Michigan.

“In all of our projects, we use the latest methods and tools to develop environmentally friendly and sustainable sites,” said Giffels-Webster Engineers President Loren Crandell. “It’s critical to control erosion and sediment so that it doesn’t run downstream to affect water quality and wildlife. Jason’s certification is unique and we’re one of the few companies with an expert in this segment.”

Mayer has educational training and expertise in controlling erosion and sedimentation. The CPESC exam requires seven years of qualifying education and/or work experience, and covers site planning and management, U.S. rules and regulations, erosion prediction, runoff management, soil stabilization, and sediment control.

With seven years of civil engineering experience working on private and municipal projects for Giffels-Webster, Mayer has executed the design and construction administration of water mains, sanitary sewers, and pump stations. He is skilled at performing detailed stormwater modeling and analysis.

Mayer is a licensed Professional Engineer in Michigan, Mississippi, Colorado, South Carolina, North Carolina, Kentucky, Florida, Tennessee and Texas. He also holds the following certifications:

- Leadership in Energy and Environment Design Accredited Professional
- Certified Floodplain Manager
- Construction Document Technologist
- MDEQ Stormwater Construction Site Operator

He is a member of the U.S. Green Building Council, Association of State Floodplain Managers, Michigan Stormwater-Floodplain Association and Engineering Society of Detroit. Mayer earned a Bachelor of Science degree in civil engineering from University of Detroit Mercy and resides in Waterford, Mich.

Giffels-Webster Engineers, Inc. is a Michigan-based civil engineering and land surveying firm serving public, private, and institutional clients throughout the United States with their infrastructure needs. For more than 55 years, the firm has been combining the right balance of expertise and capabilities with its unique perspective and vision to ensure lasting function, value, and quality of life.
