present

Services Provided
Civil Engineering
Surveying

For nearly twenty years, Giffels Webster has assisted the Oakland County Department of Facilities Management staff with the planning and implementation of their annual Capital Improvements Program. While the actual program management and decision making is performed by the department manager and director, Giffels Webster has consistently provided technical support to their staff through the preparation of feasibility analyses, project budgets, scheduling, and recommendations.

During the implementation phase, Giffels Webster provides project specific proposals then negotiates project agreements as required to achieve program objectives. Our job is to provide professional input when needed to keep the program running successfully. Giffels Webster works closely with the director and manager of Facilities Management. Our staff strives to ensure that projects are designed and constructed properly, on schedule, and within established budgets. Personal service and the “whatever it takes” attitude are at the core of this long-term client relationship. Projects have included the following:

Municipal Campus

- IT Annex Parking and Safety Improvements
- Central Garage Underground Storage Tanks
- Oakland County Animal Control Building Site Improvements
- Oakland County Impound Lot Site Development
- Farmer’s Market Site Improvements
- West Oakland Office Building Parking Lot
- Oakland County Trustee Camp Site Development
- Executive Office Building Site Improvements
- Oakland Pointe Office Complex Site Rehabilitation
- Oakland County Mental Health Center Parking Renovation

- Oakland County Law Enforcement Building Parking Rehabilitation
- Oakland County Jail Topographic Survey of Expanded Work Release Facility

Airports

- Oakland/Troy Airport T-Hanger Expansion Program
- Pontiac International Airport T-Hanger Expansion Program
- Oakland/Southwest Airport Mapping
