

Giffels Webster Names Chris Asiala Partner

DBUSINESS DAILY NEWS

Published: January 5, 2018

Detroit-headquartered consulting firm Giffels Webster has named Chris Asiala as the company's newest partner.

Asiala is the survey manager of all global positioning system (GPS) applications and high-definition 3D laser scanning at Giffels Webster and has more than 20 years of experience.

"Over the last 20 years, Chris has become an integral part of our team, and his knowledge and passion for surveying has helped us complete successful projects that improve quality of life in southeast Michigan," says Scott Clein, president and partner at Giffels Webster. "Chris will continue to help us integrate new technologies to remain leaders in surveying services in the industry."

Asiala has worked on using Giffels Webster's GPS and 3D scanning to create more informative field surveys and survey efforts for a number of redevelopment projects in Detroit. He is also part of remonumentation efforts in Wayne, Oakland, and Macomb counties. He is a member of the Peer Review Board for the Oakland and Macomb County Remonumentation Programs and formerly on the board of directors for the Michigan Society of Professional Surveyors Southeast Chapter. He has a bachelor's degree in land surveying from Michigan Technological University.

"Chris's work on urban renewal projects have helped make Giffels Webster a key player in Detroit's comeback," says Clein. "We're thrilled to add him to the leadership team."

Founded in 1952, Giffels Webster specializes in infrastructure and land development solutions for public, private, and institutional clients. The firm works with clients to achieve their project or programming goals, including civil engineering, municipal consulting, planning, land development consulting, landscape architecture, traffic engineering, and GIS data creation and management.
